Office by this place Trial Light and the second of the sec

I am willing to shoulder the respons bility of the sale of West Portland lots, together with my and all suburbs and additions sold by me. When I thoroughly believe in a locality to me that me in success. Ten years ago! gold South Portland 10ts for \$100 and \$300 cach. Three fourths of the gold South Portland lots for \$100 and \$300 etch. Three Faiths of the people said, The dear never be worth the money, etc.," and yet these same lets now bring \$1500 to \$3000 etch. We next so d. off. Coles addition. The same which, was heard and the same advance an values followed. Next Gurden Home? was thrown on the marke. Scholl's Ferry? Crossing and "Shattick's Scation" all receiving the same skeptical sneer and "ha ha," and yet 3 to 50 per cent has been made per annum on the mrestment. We must hanched Sellwood on the market. This addition or suburb created a highpout from our friends. We sed four jots per day for a year ill the same, and those who bought have redired 50 per cent. per 1 annum on their investigents. Now we come with West Potti ind, and so far we have side to the whin we did in Sellwood in the same length of time. In view of the above facts it is not need by for many offer mapples of v for selling the calos. It may not be altogether proper to make at this point comparisons, and yet we cannot refu a from saving that West Portland, in time, will be a much more desirable snouth and a nice place to him than any of those we have mentioned. "West Portland is, without question, the sightliest and most attractive locality or plat on the market. It's well understood that a motor line will be built to it, and when this is accomplished those who have bought will make a nice clean up, 200 or 500 per cent. on their investment "

+MIOTOR LINE+

We take pleasu e in announcing the fact that the railroad mon has been! nought for the road and will be on the ground in 60 days, and the road will; se graded and the track laid in say 100 or 150 days. That is what we want to do. We intend, also, if things work to our plins, to advance the price of ?

these lots to \$400 and \$500 each on or before December 1, 1800.

We own 1200 lots in West Portland. Of these 600 are put in the "pool." We also own 640 acres of land in Tillamook county. This we divide into eight So acre lots; 600 town lots, 50x100 feet, and eight timber lots of 80 acres each, make up the pool of 608 lots, sold it \$120 each. You; thinde these among yourselves in November or December. We now offer lots in the POOL for \$1.0, payable \$10 down and \$10 per month without! interest. This pric will last only for a short time, not over 30 days. If you can spare \$10, \$20 of \$30 per month you can not find on this coast any such in opportunity as this to make certain and big profits. We will make West Portland a big specess.

+Cold-Blooded Logic+

"The highest price resident lots are always found on it e side of the river where he heavy business is done, and lots on high elevated ground, made acceptable by called motor line, always bear the highest price. If these things he so no main dare disposit at fillows that residence property on the west side of the river is selling, such below its actual value. The point we make, or sick to make, is that the west side \$1.20 km are worth \$200 \$500 or \$500 each. Take this thought. The West Portland \$120 lot, for instance, are not so far from Morrison street as the \$100 lots at of near Golden Gale. Park (of I) are from Oakland ferry linding at foot of White street, and while Sattrancisco may be four times larger than Portland 1 \$0.00 is \$8.2 times greater than \$120. With equil linking for reaching West Portland in I Golden Gate Park, which will be much as lots at Golden Gate Park, or \$1.2 cach. If this be a logical conclusion it has much as lots at tortines can be made by investing in real estate and in West Portland in particular.—I actually a reader than 1 \$100 long the linking for the made by investing in real estate and in West Portland in particular.—I actually a reader than \$1.00 long the linking for the made by investing in real estate and in West Portland.

West Partland is HIGH LAND in a mathematic selection of the north We t Portland lots will be alvanced by December 1, 1889, 187 poo and \$500 cach. Don't forget it's West Polland will have a Motor line before that date. One too, if ree and four hundred per co to can be made in short time on Wet P and lots at the same at very add in South Portand, Cole's Addit of and Sollwood West P and and Mount Taborare equal distinct from the court lease. Tende and secount for each, or \$110! cish gets a paid up cond, Scripestoff co for. Address

NEWSPAPER ARCHIVE®

A BOLD MEASURE.

Our dispatches of yesterday make it mor aity certain that the Samean difficulty is sure of a speedy and satisfac ory settlement at least as to an agreement of the powers that there shall be no unserference with the internal affurs of Samoa I toculd be easy to criticise Bismark's conduct in the past in the matter of the deportant n of Valuetos, and his willful-nindness to the high handed proceedings of the ferman consul whose conduct Bismarck, now cen ures and repu dister but it is sufficient o say that Bismarch is like every other shrend bold man, when he finds he has spread more sail than his vessel can safely carry be takes in a reef Blamanck had to have a scapegont, and the German consul at banco his to bear the burden of his superior's blunder Bismirk tried to 'bluff' Cleveland and Bayard and he succeeded but he is keen enough to see that he cannot call le or stampede President Harrison, so like a servible man be retires in good order from an unease and entenable position so that so far as barnos d the war coud ass duappeared

but there is a far more sormdable difft oulty before us for harmonio as sett ement in shape of the new situation forced upon Europe and America by President Harrison a proclamation of declaring I change sea a chosed water, and directing the sexuare of the vessels found possibing within its limits. This was among the presider it's carliest acts and in our judgment it is fraught with what may prove disagreeable consequences. This provisination of the pre ident was made to extrect of a heated debite in the Cana. re of commons on the 28th inst. and liberals and conservatives united in denonneing the position of the United States as absurd and utterly untenable in short a otation of international aight our John Macdonald declared that all maxime nations would resist the claim of the United States to exclusive jurisdiction over Behring sea, and predicted that if the United States did not recede from the position taken in President Hayrison's produmation grave comp. reations would arise. n our judgm Sur John Macdonald did no exaggerate the situation which promises in the near future to become serious If President Harrison's proclamation is strictly enforced, and all vessels are esized within this year body of water which has been proclamed. a closed sea, it is morally certain within the year that we shall find it a United States war yessels, patrolling these waters con ironted by Canadian or British gunboats and a collision likely to take pass at any mo ment, if the United Stakes persists in senging all Canadian vessels in all parts of Behring

The Canadian claim is that the United States has no jurisdiction in this sea outside of the three marine miles | zant. Neverthe less the United States sozed three ships from Victoria, B. C. in 1886 and eight ships in 1887, confi-cated the vessels and cargo and has pever admitted the right of the owners to compensation. It should be remarked however, that President Ha rison did not is aue his proclamation upon his own judgment, but because he was commanded to do so by act of congress
The Issue-between Canada and our nation

is plain, simple and irreconcilable. The United States declares that the water in question is a closed sea and Canada trens this claim with angry contempt. It is mor ally certain England will sustain the postion of Canada because the would probably be supported by the other powers of Europe who fish in Buhring sea — this also easy to see that if American gunbouts acting under the peremptory orders o the president's roclamation serve all foregen vessels within proclamation seize all foreign vessels within this sea, a conflict between our war vessels and those of the maritime powers of Europe is likely to take phico within the year kyen slight study of the his-tory of this subject will render it fory of this success which bearing is doubtful whether the claim that Behring is of Etrope did not permit England or any other power to make the ucz canal or the tain itself in the position that a body of water as vast as Behring is a closed sea over which the United States holds exclusive jurisdic tion It is not unlikely hat this act may bring us nearer to troube with England than anything that has imprened since the Alabama claims There vos no real danger of war beneath the Samoa difficulty but the Behring sea proclamation nade a plain irre and the other mantime powers of the world and somebody in the near fature will be com-pelled to retreat, for there can be no com-promise. The sea is cither open or closed If it is treated as closed then Lanada is beaten, but if is not a cosed sea then the abips of every nation have as good a right to use its waters as have those of the United States, as good a right to the it as the lin ted States has to use be Wed terranean or ked son The question seem to be of serious consequence for sottlemen

ELECTRIC FOREF

Development of electric power is yet in its mine, But it has make progress enough to indicate very clearly that it is destined to produce more changes in the industrial affairs and economic condutions of civil zed life than have been produced latherto by any agency or force that has been brought under the control of man. The progress that has been made so far in turnit g electrical energy to the service of man makes it certain that its uses will become pre-ticely illim table.
Its possibilities me yet and probably will remain for a long petico beyond human

The cheapest power is water | ower but in over small areas. Hith rio therefore the benefits which could be i r ved from a great water power have been restricted to narrow limits. But now a great water power like that at Oregon (ity or Spokaue I alls used for the development of electric force from be distributed, and fully depended in through out an architz ten or iffeen miles from the central poin. He is not improbable that as the conditions necessary for distribution be come more fully known there may be pro-

as widnly as desired, is a fact that increases the value of a great water power beyond all calculation. It is a fact that is destined to make the falls of the Willamette do the work of the city of Portland, and furnish its light, it will be office a great factor in bringing about concentration within twenty miles of the falls of an immense population with of the tarts of an infinite popular vast industries and it requires no spirit of prophecy to foretell that within the time of the willar, etter the falls of the Willar, etter the rest the most valua ble property in our state Indeed, when situation and other advantages are con-sidered, there is hardly another property in the United States, except the falls of the Spokane, that can be compared with it

At Spokane Falls the problem is sampler

At bpokane Falls the problem is sampler than at Portland because the great water power is in the midst of the city and may be used simply as water power or when converted into electric force may be distributed exist and without appreciable loss. The water power alone was a foundation for the city of bookane Falls. The investment city of Shokane Falls. The immensely wider used to which it may be directed by its r uses to which it may be directed by its conversion into electric energy are telling alreads with great effect upon the prosparity of the city and these uses will multiply by geometrical ratios promoted by the growth of the city, and in their furn promoting It is plan that the economic value of

electric energy, particularly in localities where great water power is available, is destined to become as potential a fact in in dustry and civilization as any of the great physical discoveries that have preceded it, and it is possily; that it may produce greater results than them all

ONE HUNDRED YEARS AGO

One hundred years ago, when Washington was inaugurated, we were an agricultural people and even in this respect for behind Europe Drall plows were little used, and no artificial grasses were sown save timothy in the Middle states. The American was so several, utilitarian that English immig-ants were advised to bring flower seeds with them as they were hard to procure in Amer ica Castaron plowsbares had just begun to come into use, and the cradle was supplanting the scale Foreign obsevers agreed that at this time the American cautle were small and inferior, and the American farmer fifty years behind the English farmer in the practice of new and improved rieth ods of agriculture Better and cheaper ships, however, were then built in the United btates than in Europe The tonnage of the British empire was then about 1,400 000—not much indre than three times that of the United States—The imports in 1788 amount ed to somewhat less than \$18,000,000 and the exports to somewhat more The chill articles of importation were spirits wines, tea and coffee, sogar and molasses, salt dry goods, and other manufactures. Two thirds of these imports were from Great Brians The returns of the English customs service show in 1789 exportations from the Linted atutes to Great Britain to the value of £1, 000,000 maportations from Great Britain into the United States to the value of £2 500 600 The principal exports of the United States 100 years ago were grain flour, tobacco fish trade with the natives of the Northwest coast, California and Oregon where the chief arti-ces of commerce obtained were the furs of the sea ofter. The Brench traveler Brissof who afterwards perished on the scaffold with the Grandists writes that in 1789 there was a project of establishing a passage between It mue and the Pacific by the way of

Lake \icaragua In gener d commerce, in 1788 I hiladelphia stood first. In the value of their exports lyrging, South Carolina and Massach setts stood next. Then come New York and Maryland. New York did not lead the praercial states until 1797. Of banks there were only three then in existence in the country—the Bruk of North America at Philadelphi the Bank of New York, and the Bank of Massachu-etts at Poston. The capital of the first was not to exceed \$2 000 000 the Boston bank held a capit d of \$100 000 The average rate of taxation in the Umted States was then not far from \$5 on \$1000 The centennial hundbook of the spinor the centential frindpool of the navia diffee of customs at the part of New York shows for 1789 in dispreportionately large importation of distribled I quors and wine rum, gin Maderia and port composing the bulk. About one half the vessels came from the West Indies and nearly everyone brought rum times lemons and sugar. one brought rum times lemons and and an occasional green turtle. If irdwire and steel came from Leghorn Maderra win from Nova Scotin shoes and suke from the West Indies and 20,000 bracks from Fristol while to a came from Amsterdam pairs of women's shoes and one umbre la ness in women's success and one ambre in ness imported from Bordeaux. A ship from lingue de Grass brought as its sole cargo a box and a bale for the then I reach nunister President Washington imported a pair of globes John Jay some wine while the famous Aaron Lurr and his cousin, Jona than I dwards received a len imported books at different times. The original John Jacob Astor had a quantity of fury returned to him and Gulin Aerplinck received the enormous quantity of 21 3.4 gallors of gin tered for the mi map delection—an increase in one lot from Amsterdam first year there arrived at No. om Amsterdam During the

averaged less than half the cargo capacity of vessels of the same of the to day the sax months was given on dutic part the there was no warehousing or transportation One hundred years upo George the Third was king of England with the younger Pitt for prime minister - I rederick the Great had ment to 870 against it not been three years in his grave, the great brench revolution had a set commenced its first maddings. By ron was about a year of a Sapoteo a and Wellington were sub-lieuten

into just beginning their nutriary enter-and Robert Burns was still journey his sweet wood thrush son, and his blithe blick hird white into the delighted err of bootland The Lort An cles fixed a proof or the aston shot, creducts of mankind Amon beref hone a people of considerable math genee it certain directions embark in an en terprieth thad for itshe d han land voice, ont an are five ten or fifteen miles from the central poin. It is not improbible that as the conditions necessary for distribution is come more fully known there may be produced at many points but production of its always attended with expense. Conveyagenth it is developed with expense. Conveyagenth it is developed most where the expense is least—that is where conditions favorable to its development more freely than water power in comparison with the fire distribution of closure force made possible by new discovers and applications thereof it is stil bound in this issue as power in this way involves the expense of an additional process of transmittation. He had the additional process of transmittation additional process of transmittation. The shightest cilorate more freely than water power in comparison with the fire distribution of electric force made possible by new discoveries and applications thereof it is stil bound in this issue. Used as a power for generating electric snergy it is expensive as commarded with externover, since preduction of electric flat power, since preduction of electric flat power in this way involves the expense of an additional process of transmitation. He had the steam of the finite flat power in the water power is how seen, convertible mile electric sensors. The water power is how seen, convertible mile electric sensors with the state of the state of the state in the state of the state is not be converted by the state of ricion i rica (n this constior nothing save a bubble and squeck brun and the aspiration of a social ince dury aid commer tal charlatan. The shightest effort at

this and then to advance the price of sait to consumers to a rate that will pay the sub-sidy to the Brush and leave the American monopolists a great additional profit The saitmakers of the United States b ive already formed the necessary "pool" and it is be-heved that Mr Burt can make the arrange ment with the English sait trust. It may be remarked here that Mr. Burt has made an minience fortune in the salt and lumber and last fall was the democratic

Colonel Auchmaiy an architect and builder of New York, has founded and is successfully carrying on a number of trade schools for training young persons to a practical knowledge of such occupations as carpentry. brickinging, plumbing and various industries in wood, stone and metals. From his schools no less than two thousand young men have already been sent out, who are finding their way into good positions all over the country. They receive from the training schools sufficient practical instruction to enable them to apply with confidence for employment in the industrial trades, not indeed as finished workmen, but as persons possessing a degree of knowledge and skill that can be turned to account in advancing themselves to the rank of master workmen It is possible that schools of this description may yet be developed to a degree that will a want in the industrial education of of the country

In Maine there are pious folk, who an nounce themselves as strictly temperate and yet treat their resolution by means of a plous fraud known as "stomach bitters," A respectable citizen of Pembroke, Me, re cently grew very bilarious upon these "stomach bitters" and the village druggist who sold the blitters was arrested and brought to trial. He pleaded not guilty on the ground that he had sold only a bottle of stomach bitters, which he declared was not intoxicating, and handed the justice a scaled bottle of the preparation, together with an invoice of the same from a Portland druggest of whom he had bought the goods The local division of the bons of Temperance sent the bottle of bitters to bt ite Assaye Robinson for analysis and that official found at contained 45 per cent of alcohol, the bal ance being mainly water

The inquiry as to whether the strange sparrows in our streets are the English spar row or not recalls the fact that English spar rows were originally brought to New York under the mistaken notion that they were an insect devouring bird and would extermit ate the worm that destroyed the foliage of the shade trees A short time after their im-portation it became clear to housekeepers that the English sparyow was a greater nu-sance then the worms that he was introduced to devour This attraction sumulated a New Vork lady to ask her son, "Which do you think are the worse, the worms or the spar rows?" The answer was "I give it up, mother, for I never had the sparrows

Oregon and Washington ought to be glad that the Oklahoma flight of human locusts did not speed to the Pacific coast, for it is not this sort of illiterate, ignorant, imbedde mm grants that are needed to make Oregon and Washington blossom like the rose. Or egon and Washington are getting an excel-lent class of immigrants from the Leat, who know the difference between Oregon, where and in the Iuland Empire' or the Willam ette valley produces not seldom thirty bushels of wheat to the acre, where wood and water are plenty, and a land like Okla homa, which recalls the 'old chestnut' No grub twenty miles from wood and water, nevertheless God bless our home."

It is asserted by the Manufacturer's Record (Baltimore) that the present year will be the greatest thus far in the development of the industries of the South. For the first three months of this year the number of new enterprises in that part of the country was 1676. This is 2500 below the number representations. senting the same months of last year but it stands for \$58,227 000, against \$35 fb8 000 for the spring of 1883. This change from an the spring of 1883. This change from an exclusively agricultural industry to an in dustry diversified by manufactures portends a change in the South on the relations of politics to economic questions

5 a new a faster overland train will be put on from ban I rancisco to Omaha, and a fast trun will also be put on from Portland to connect at Granger with the fast train from San Francisco The time from Portland and San Francisco to New York will be re duced to five days. It is supposed the train from Portland will start about 2 P M

The Canadian extradition bill that passed the Dominion senate last week if it becomes a law by approval of the English govern-ment will break up the o called "American colony of fugitives from justice, as it in cludes a retroactive clause which provides for the surrender of persons who were fugi

ot 635 over the registration of one year ago. The registration indicates a total nonulation Inst yers there it reves a transfer to the foreign ports (15 yes else of which 21 were of 15 600 to 15,600, and a gain of upwards of sloops in d 140 were schooners. These as all odd the three in the dresself that day in the L come is rapidly becoming a line.

The vote of Loston on prolibition was 11 (6) yes all 0 > no. The only city in the state that gave a control the majority for prohibition was the offerty of Salen where the vote stood 2009 for the amend

BEHRING SEA.

Denial of Ixclusive Jurisdiction by the Inited States

Montre il II raid

It is true that kname claimed exclusive jurisdiction over Behring sea, but this con-tention was successfully combitted by the American government in 1822, and in April, 18_4 when a convention was suned between Pussia and the United States, in which the former abandoned her pretensions to restrict nav gation in Behring sea, so far as Ameri-can citizens were concerned. In the follow ing ye is a similar convention was signed be tween Great Britain and Ru sia in which

and (2) that there is a portion of the seus a acent to every instant over which the sovereignty of that nation extends to the exclusion of every other pointed authority. This is an emphatic repudiation of the claims now put forward by the United States and its highly improbable that even Mr Blaine will seriously attempt to maintain pretentions which were repudiated, and successfully combutted by the United States and Great Britania in 1821 and 1825.

NOTES OF PLRSONS

The Czar of Russia is learning to play the cornet. This may account for the recent attacks on his life

THE ENTRY PEE MUST BE PAID

A middle aged German woman and her husband made a call it the poince station seaterday moon, and introduced themselves by handing the police captain a sheet of pa for on which had been resistant a same statement explaining the object of their visit Nether of them could speak any rightsh
The noman who acted as spokesman to d

The woman who acted as spokesman to d
the raporter that they had come to the city
in hope of sucuring sufficient money to pay
there are yellowed as a piece of government
land on the Samiy inver in Clackum's
tourry. She said they lived several years in
Nebraska, but as they could not make any
thing there they came to Oregoniast fall ind
took up a homestead. What little money
they had was taken from them by unvery
julous land sharper and they were obliged
to commence work almost extirely destitute
By hard lubor they have succeeded in their
ing onclacre of ground which they planted
to potablese curly this spring. But, as they
have no income at all they were obliged to
iook elsewhere for the necessary funds
with which to meet the registry the for the
land office. Hely were other withing to work
or receive a little ansistance from the geter
one spirited public.

The man had his feet frozen while living
in Nebraska and from appearances the
woman had been doing all the work both in
clearing the land and providing subsistence
for betself and husband.

The paper given to the police captum was
virtually a netthroaf or

or ineseif and hurband. It protons subsistence for ineseif and hurband. The paper given to the police captain was virtually a neition for subscriptions. It was written by some one inving neithe little faint of the German family, who had him self her led the list with \$1. Captain Cardwill have the unfortunate woman directions for it. In the courthou was I told for to call on the carmy pulge the morn in Judge Cathin will no deal induce the man and woman what course to pursue under the circumstances and render such assistance is may be required.

Ti is not often that we have the opportunity of treating our out of town friends with one of our Great Special Sales:

And this is too good an opportunity to allow it to press unnoticed. One of our favorite methods of advertising our business and making new acquaintances and friends is through he medium of the special Sale. We know that an appeal to one is purse, when it is an appeal that will prove of pecuniary benefit to the purchaser, is most potent and all-powerful, and it is for this reason that we offer you goods for a few days at manufacturer's cost. You are most cordially invited to visit our store and inspect our various departments, no matter whether you may be intending purchasers or not. Come and see us, get acquainted, and make yourselves at home in our store. Our Centennial Sale will be for

Enterprise, he was a character among the Bohemans, and was associated with many jolly souls who are now ritimbered among the missing, and many who are still well-known in San Fluoreisco. Mark was an ardent angler, and was never

Mark was an ardent angler, and was never happier, than when stiting with his legs dangling over the side of a cozy yatch and waiting for the slow and lazy nibbles of the denizens of the sen. In these days Alexander Badhan and Fult Berry owned the my Famy Ann, and to gratify Mark's piscatorial whim they fitted her up one duy with a dozen or two bottles of bat and a lunch, and with a few choice friends steamed off for Angel Island. Mark bad cone tantly expressed as the desire of his lift that he might catch a ross of red rock cod; those in the Sim Francisco markets being of a bright red, very attractive, to look at, and very choice food fish.

Of Mark Twain, O. P. Sutton, formerly secretary of the Pacific bank; General John McComb, then editor of the A ta; a prominent Comb, then editor of the A ta; a prominent San Francisco judge, now deceased; Alexander Badlam and Fulton Berry. The two latter, knowing full well that there were no red rock cod this side of the Farellone islands, purchased a large, fine specimen in the murket, and, placing it in a gunny sack, anuggled it on board the teamer. After a pleasant sail across the bry the Fanny Ann was anchored across the stream at a point on Angel island known as Lalston's quarry, so called from the fact that the rock for the Bank of California was faken from that place. The tide was obbits strong, and, after auchoring, all the party except Balliam and Berry dropped their lines on the lower side. Lace two gentleme: dropped theirs on the upper side of the steamer, with their lines drafting under the steamer, while those on the opposite

TRAILED TOWARD THE SEA. When unnoticed, Badlim attached, the large red rock cod to his line, and, apprising the others of the fact, pulled him to the surface amid great excitement. The fish was impediately placed in a barrel of water, which had been provided to keep slive what is, hingh the caught. It was suggested to Mark Twain and his friends that they had better fish on the upper side of the steamer, as they proferred shady places, which was concurred in.

After the lines had troller under the clean.

as they proterred shady paces, which was concurred in.

After the lines had trolled under the steamboat, Berry removed the bait from his hook, and on the opposite side trailed and caught Mark Twain's line. The latter, complaining that his line was foul, was assured that on the swinging of the steam post it would soon loosen. In a few moments the rock-cod was taken from the barrel and hooked on to Mark Twain's line. A vigorous pull was given, and at the top of his voice Mark yelled out: "I've got a wanle! I've got a whale! He landed bits in fine Shape, the two jokers taking him off the hook and placed him in the barrel.

MARK IMBELIATELY PROCURED

MARK IMMEDIATELY PROCURED A piece of chalk and commenced to score the catch of each of the fishermen, and durme the next two hours this same lish was

The fish having had its alls all torn out, scales most torn off, and no place to hook on to him any more, the jokers in desperation hished up Twaln's line and Sutton's line at the same time, and tied a monkey-wrench on the former and a hatchet on the letter. Screens were relied that they had got a devi-ish, and the wrench and hatchet were landed on the deck. Words cannot depict the faces of the Ishermen. Twain pulled off his coat, inoked at the acoraticoked in the morkey-wrench, at the fatchet, and them at the barrel, rolled up his sleeves, and them do not the poor solitary worners. and tished out the poor, solitary, worn-out red rock cod, and bolding it aloft, said: "Boys, we have had lots of fun to-day; let's go home." He was the only one in the party who took it good natured y, the other gentle-men refusing to converse on the sport of rod, cod fishing, and always looking on the trans-action as a very mean jose.

WASHINGTON'S APPEARANCE.

He Way a Giant in Size and Physical Strength—A Scarlet Nose.

Wushington, according to Hondon's measurements, was six feet two inches in hight. He was a giant in sixe and physical strength. David Ackerson, of Alexandria, Va., who

saw him, wrote in 181 as follows:

"Washington was not what ladies would call a pretty man, but in military costume, a heroic figure such as would impress the memory ever afterward." memory ever afterward."

The writer had 2 good view of Washington three days before the crossing of the Deta-

three days before the crossing of the Deliware.

"Washington," he says, "had a large thick nose; and "I was very sed that day, giving me the impression that he was not so moderate in the use of liquors as he was supposed to be. I found afterward that this was a peculiarity. His nose was apt to turn searlet in a cold wind [He was standing nearle camp fire, evider by lost in thought and making no effort to keep warm. His eye was so gray that it joked almost white and he had a troubled jok on his coloriess face. [He had a piece of woolen tied around his throat and was quife hourse. Washington's boots were enormous. His ordinary walking shoes were No. (I. His hands were large in proportion. His moults was his walking shoes were No. 41. His hands were large in proportion. His mouth was his strong feature, the lips being always tightly compressed. That day they were compressed so tightly as to be printful to look at. At that time he, weighed 200 pounds, and there was no surplus liesh about him. He was tremendously muscled, and the fame of his great strength was everywhere. As to his habits at that period I found out much that might be interesting the vise an continuous eater, but was content with bread and meat, if ho had plently of it. But lunger seemed to put him in a rage. I was his custom to take a drink of rum or whisky on awaken. Joing in the morning.

"I saw him at Alexandria a year before he died. His hair was very gray and his form was slightly bent. His caset was very thin, the heart false rech watch did not fit and

ing in the morning.

"I saw him at Alexandrin a year before he died. His huir was very gray and his form was slightly bent. His caset was very thin. He had false teeth which did not fit and pushed his under hip outward,"

There is an organized effort, it would seem from the amount of adverse criticism on the late African expedition led by Stanley, to decrybis reputation and judgment. The expedition is pronounced a lamentable failure in every particular, and it is holdly announced that in the contemplation and execution the movement in connection with the rescue of Emm Bey was a series of blunders and gross miscalculations. The authors of this attempt to depredate Stanley are in many cases rivals. Men who have done little where Stanley and done much have glassys hounded his track. The leading writers who now make outery against the mistakes of Stanley are those who have for two years been assuring the world that Stanley are done at the record of the steep that the reduce of Stanley are possibly located he be anything else. The great cxploper has turned up rilive, and these jealous hear are mad that he did not accommodate their theories by prever appearing again on earth. Had he taken the route prescribed by his rivals, in all probability he would have fallen on African soil. He is, however, in existence, and his whole story is yet to be given. With the failure of Stanley as a humane and fearlest discoverer panenking has a large interest. Before listening to his definiers the years importing of the leroes of the race will wait until Stanley speaks for himself.

Harsfard's Acid Phosphate

Makes an invigorating draft with wait rand sugar early blustering and heart of phosphate was a humane early peaks for himself.

Makes an invigorating draft with wait rand sugar early blustering and heart and processing and the Nice in a connection of the leroes of the race will wait uncleasely peaks for himself.

The Scare Steed 7 to 4-It Wim Not a Very Propitions Day to Play-The Standards' Battery To Be Strangthough.

it was a listless, uninteresting game of the great center for one smelting on this ball that the Williamettes and Standards played at Clinton's & McCoy's grounds in East Portland yesterdey afternoon. The testimm of the nine innings was not relieved by a single brilliant play, not even a two-bagger. It was the opening guine of the season.

n. The Williamettes won with hands down, but they would not been such easy victors had Barker been put in the box for the Standards at the start. He began twirling in the sixth, and during the rest of the game kept the East Portlanders down to two scratch bits that counted for nothing. Lan-dia was hummered all over the field. In the fitth inning he was whacked for five clean hits, which helped materially to pile up four

Owing to the recent rains the grounds were not in condition for ball playing. The infield was in fair trim, but the grassy outlield

MORIN WANTS WITNESS PEES. His Lip is Healed and Hrs Peeling Towards Cody

criminal court of maybens, no los

teins the feelings of spite against the prisoner he once had. "My lip is now all right," he said to a reporter, "and I am sorry that the lining ever seams to such a termination. Of course, I still insat that Cody bit file, and when I got on the witness stand, I had the swear to the

on he witness stand, I nad to swear to use same facts.

"I feel sorry for his wife and family. I know that they all must feel terribly had about it, but what can I do for them? I sympathize with them from the bottom of my heart."

my heart."
"Have you still the same anxiety to see Cody behind the bars of the penutentlary?" was asked him.

Morin shook bis head and popled in the

sorm snook his head and pephed in the negative.
"One thing I would have, bowever," he said, "is my witness less of \$55 for remaining in the county init twenty-cight days, awaiting the trial of Cody. It is wrong for the state to keep me in confirement, and then not pay me anything for ray time."

Morin's lip is entirely healed and the scar is carcely noticable. Some people have an idea that the entire lip is gone, but this is not so. If a person did not have his a tention called to the fact, it cound scarcely be observed that the lip had ever been injured. The least little depression in the certer is all that is noticable.

PORTLAND WILL HAVE & SMELTER. Work at Linton Going Ahead-Ground Soon To Be Broken for Thous Works.

A great deal of interest has been felt by the public in the proposed smalling works at Linton, in the northern suburis of the city, and a great many inquiries have been made. In regard to the progress being made and the prospects, for their completion.

the prospects for their completion.

The company having this project in hand the articles of incorporation last week, and articles of "The Forband Smelling and the fining Company," and hoee having charge of the affairs of the company, state that yound will be broken this week for the shall be company, and the the work will be pushed the company and the the work will be pushed to completion as rapidly as possible. So far, the work done has been of a preliminary nature, which has not made much showing, but, nevertheless, a great deal of work has been done, and The Chrisonian is assured that the smelter, when completed, will be first-class, with one of the finest sants obtainable and all the lasest improvements that the smelter will be on the south end of the last throught by the company, and 900 feet

THE FIRST BASEBALL GAME

orn Pacific railroad and the society road, and a spur will be put in for the present from the line of the Northern Pacific to this wharf for the delivery of ores, and a spur will be put in for the present from the line of the Northern Pacific to this wharf of the delivery of ores, and the standards in an Unspirited Contest.

The Williamettes Down the Standards of the Northern, 2000 feet in longth, application of the Northern, 2000 feet in longth, applications of the Standards of the Standards of the Considerable lumber is on the ground and standards of the Standards of

several buildings for the company are being erected, and some fifty men with be put to work there this week. From this it may be concluded that the smelter is a settled fact, and there is every reson to expect that in the not distant future Portland will become the great center for ore smelting on this coast.

All the preliminaries for the fast celebration ever to be witnessed by this generation, of the anniversary of the inauguration of George Washington, have been arranged. The various committees have gone about ther work in the proper manner to make the affair a grand success in every particular. An informal meeting of the invitation

an informal meeting of the invitation and programme committees was held at the armory vesterday afternoon to talk over matters, so that they may work harmoniously to-morrow. There were present at the meeting Messrs. Kupur, Beebe, Cohen, Dodd, Paxion, Hughes and Zan. The meeting metally at the O.N. Company.

ing was beld it the C. N. G. armory.

It was decided to erect a review stand directly opposite the Fifth street entrance to the posteffice. Here Governor Pennoyer

will review the procession as a procession was fully discussed. The grand murshal's order for the formation of the parade has been delayed somewhat, owing to the fact that acceptances of the invitations to hardinghed have been coming it along. The order will

SERVICES AT THE CATHEDRAL.

In conformity with the order from Arch-bishop fores, the belts of the Stark-street cathedral will be rung for half an hour to-morrow morning, commanding at 9, 30, and will stammon the congregation to services commenorative of the one hundredth anniversary of the manguration of Washington. Hayden's third mass will be sung. Rev. Edward J. O'Dea efficieting. Father J. Rowliman sub-dessen of the mass. For the offertory the choir will sung. "The Star-Spangled Benner." As the finale Saturan Father J. Hortigman sub-dessen of the mass. For the offertory the choir will sung. "The Star-Spangled Benner." As the finale Saturan Father Depublicam (God save the republic) will be sung. Father O'Dea will deliver a sermon smitable to the day.

WILL BE CELEBRAYED.

WILL BE CELEBRATED Congregation Above Sholem will celebrate Washington's inauguration at 6:30 P. M. Tuesday. Hon M. C. George will deliver an address at the Sixth street synugogue. The public is generally invited. THE TURY VEHELY.

Dr. Paul Semiler stated yesterday that the Portland Social Turn Verein expected to turn out in the parade to-morrow, about 120 strong. The little garl classes, attired in their tidy blue uniforms, will ride a liberty their indy blue uniforms, will ride a liberty car, handsomely descrated with flags, buni-ing and other appropriate emblems. The mate members of the association will march in a body. They will wear caps procured specially for the occasion.

VOLUNTKER PIREMEN'S ASSOCIATION. About thirty or forty members of the l'ort. land Volunteer Firemen's Association met, pursuant to a call, in their room at the poince court yesterday and made arrangements for participating in the parade to-morrow afternoon. They selected their uniforms and will get themselves in proper trim for the occasion. It is expected that about seventy-five members of the Portland association will turn out.

LOUAL NOTES.

Many streets of the city stand sadly in need of the scraper and shovel.

If to-morrow is only clear and bright, Portland will give a rousing celebration.

"Wonder i it will be clear Thesday?" is the question that is now troubling every-body.

The prospects for the "June freshet" do not appear very flattering. Owners of lish wheels do not like the outlook particularly well.

whells do not the the outdook particularly well.

Though yesterday looked threatening, and the bending heaven seemed ready to weep, yet many hundreds were out taking an April aring.
Glorious wonther for all sorts of cropsgrain, fruit and berry. It is now rather late to tear damage from frost, and a vory abundant yield is confidently expected.

There are very few more beautiful cities than Portland to be found anywhere. Looking at the city from the high ground in Holladay's addition, the view is a charming one. Portland, at this season, uppears, metaphorically speaking, to be afford in a sea of green. For number and beauty, our shade trees need not take a back sent.

PERSONAL.

Joseph B. Grisman.
Joseph B. Grisman and his wife, Phobe Pavis, are domiciled at the Gilman.

Mrs. Harkleroad, wife of James Harkle-road, the contractor, has been quite ill for the past five weeks.

A FAVORITE BESORT.

The "Dividend" sample rooms on the south side of Stark, between Front and First streets, are a tavarite record for gentlemen. Mr. Frank Hall, the proprieter, employs none but the best mixelogists and dispenses motaling but the obsidest brands of wines,

This Taik of Cinching the Farmers Was Started by a Gunning Pellow Who Had Binders That He Wested to Sell.

In these days of great achievements in an uses cays of great achievements in mechanical inventions many unexpected things are brought about in ways totally unfooked for. The perfecting of a machine for using twine instead of wire for binding grain has caused an increase in the demand for various fibres of more than 50,000 tons per year, which demand has caused. year, which demand has arisen all at once, as it were, and has quite outrun any in-crease that can be made in the production. As a consequence, far-seeing dealers in fiber

As a consequence, far-seeing dealers' in fiber made large purchases and the price of twine advanced. Farmers took the alarm and in many states granges and other associations have been forming revolutions to guard against extortions by an imaginary twine trust.

An idea has not abroad in this state that the prices of twine were to be greative advanced. Seeing a large lot of this twine on a fram the other day a reporter called on several prominent dealers in agricultural mellements to inquire about the price to be charged farmers for this twine.

One said: "We shall sell binding twine for 18 cents, or as chean as any one does."

Then ext one visited said: "The price of twine will be 18 cents. That is a little higher than it was last year, but there has been agreat advance in the cost of the fiber and manufacturers have advanced prices. We shall make very little if anything on the twine."

shall make very little it unything on sue twine."

Another said: "It is very early in the season and thore have been no enistor twine yet, but it is understood that the price will be the same by all dealers, is centry per pound, and of course any cut in prices will be met."

"Well," said the reporter, "this is singular, it has been recorted that there was to be a big price charged for twine, and farmers have been preparing to defoud themselves."

ceptances of the invitations to hachispate, have been coming in alowly. The order will be issued and distributed among the different organizations to-day.

At the meeting vesterday, it was definitely decided that the procession will move punctually at 1:30 l. M.

The field and staff officers of the First regiment will receive the Third regiment on its arrival on the O. E. & N. regular train tomorrow morning. They will also meet those of the same regiment that arrive on the special train at 10 A. M. at the L street depot, East Portland.

Company J. Capitain Coffice, will receive Company J. Capitain Coffice, will receive Company J. Capitain Smith, will receive Company J. Capitain Smith and J. Capitain Smith Capital S

APPREHENSIVE FOR THE GOVERNOR. An Amusing Remark of a Young Man Just Liberated From Prison.

The other day, as Governor Pennoyer was passing down First street, he noticed a well-built, rather good-looking young mun standing in front of a store and taking things brisarely. At the second glance he recognized the young fellow as an ex-convoct, whom he had recently randoned, as he thought there were doubts as to his guilt. A warm shake of the hands followed the mutual recognition, and the two conversed for a moment. When they were about to take leave of each other, their hands still clanned, the young fellow smiled us he said:

"Now, governor, I hope that hereafter you will take care of yourself."

"You will do the same, I trust," said the governor, con iderably surprised at the interest taken in his future.

"Oh, yes, you but I will." passing down First street, he noticed a well-

BAKER'S

Garonius Beerl

Winranted absolutely prese Cocos, from which the excess of Oil has been removed. It has more than three kmes the strength of Cocos maxed with feared, Arrow-root of Sugar, and is therefore far more economical, costing less than one cent a city. It is delicans, nourshing, strengthening, easily di-gested, and admarbly adapted for in-valids as well as for persons in health.

93 First Street,

field was in lair trim, but the grassy outheld was soggy and as slippery as a crossed floor. Heverni of the errors were attributable to this state of affairs. The sky was leaden, the air a trifle raw, and down pear the horizon mists hovared and segmed to portend a downtour. Toward the end of the game the sun made a feeble effort to shine, but not early enough in the day to call out more than a few hundred people to see the game. Both teams appeared in new unforms. The suits of the Willametter are of white, with rest stockings and belts and white caps with fed trimmings. The Stardards were notice by the suits of the willametter are of white, and the caps with fed trimmings. The Stardards were notice that one of blue.

matty brown uniforms, with stockings, beit and cap of blue. The personnel of the Williamettes is the same as last year, except Morean, the first haseman, who played with the Portlands and Pendletons last season. He cavered his position very well yesterday. The Standard nime is a new one, and includes among its members Barker and Blanchard, who came here with the Sait Lakes. Its battery needs at members with the Sait Lakes. Its battery needs at my standard the bat for the Portlands last year, has been engaged to support Earker. They will make a ratifling good battery.

The Willamettes outplayed he Standards in the field and at the hat. The latter were particularly weak at the bat, Farrott scoring eighteen strike-outs, G. Parrott was caught napping at first in the eighth. He roiled a grounder toward Bi. nohard, but it moved too slowly to be handled in time to put him
